PROFILE SUMMARY

Self-taught AI and Android developer who learns by building: shipped four open-source Android apps, two with on-device speech AI. Ex-Zenardy NetSuite developer; automations cut Crunchyroll's PO-to-bill approval from 2 h to 10 min. B.E. Mechatronics, CGPA 8.29.

KEY PROJECTS

LiveSub: Offline Live Subtitles & Translation (Android)

Oct 2026

Kotlin, Jetpack Compose, Sherpa-ONNX, Silero VAD, Google ML Kit | github.com/R-Dilipkumar/LiveSub-Offline-Translator

- Captures any app's audio or the mic, transcribes, translates and overlays live subtitles on any app; fully on-device: no account, no API key, no audio uploaded.
- Streaming or ~1 s whole-phrase ASR (SenseVoice, Moonshine, Parakeet, Whisper); native crash guard, atomic model installs, ordered translation queue. v1.1.0 shipped in a week.

Offline Reel Captions: Auto Subtitles for Indian Videos (Android)

Oct 2026

Kotlin, Whisper + Sherpa-ONNX, IndicTrans2, Media3 | github.com/R-Dilipkumar/offline-reel-captions

- Offline captions for Tamil, Tanglish and 5 more Indian languages (per-language Whisper models, Silero VAD); shows original script, English letters by sound and an IndicTrans2 translation; MP4 or .srt export, 61 unit tests.

Net One Tap: One-Tap Mobile Network Reset (Android)

Oct 2026

Kotlin, Shizuku, hidden Android APIs | github.com/R-Dilipkumar/one-tap-network-reset | research write-up

- Restarts only the mobile radio via hidden setRadioForSubscriber (Shizuku or root), tested on Android 16; per-SIM 5G status.

Also built

2023 – Present

Artisan NPR Studio: 134 offline GPU photo filters (OpenGL ES) | github.com/R-Dilipkumar/photo-art-filters-android
Local Mobile AI: Termux assistant, Obsidian graph-RAG memory | **IN-THRUST**: wall-climbing robot (capstone)

WORK EXPERIENCE

Associate Developer (Technical / NetSuite Consultant)

Sep 2025 – Jun 2026

Zenardy Technologies Private Limited | Chennai, India (Hybrid) | Technical Intern Sep 2025, promoted Jan 2026

- **NetSuite automation:** Built SuiteScript 2.1 User Event scripts for Crunchyroll's PO-to-bill 3-way matching, cutting approval time from 2 hours to 10 minutes; handled change orders and multi-subsidiary tax.
- **Coupa integration:** Stopped credit memos applying to settled invoices; maintained Coupa invoice and vendor-payment sync into the NetSuite GL.
- **Integrations & ledgers:** Built Filevine to Zapier to NetSuite syncs, a NetSuite to Google Sheets live GL pipeline (Apps Script, OAuth 2.0 / TBA) and client-ledger views for two law firms; triaged automation errors with AP teams via Jira.

Mechatronics Engineering Intern

Apr 2024 – Jun 2024

Titan Engineering & Automation Limited (TEAL) | Hosur, India

- Calibration, end-effector testing and cell operations on FANUC robots; PLC ladder logic and C scripts for machine diagnostics.

Coding Coordinator & Campus Leader

Aug 2022 – Mar 2024

Kongu Engineering College | Erode | Ran Nexus and Throb coding events; mentored 20+ students
